

CLIP2VU

VIDEO CLIPPING IN REAL TIME

Clip and stitch your Live & VOD video footage, with fast publication to your chosen platforms.

videosuccess@vualto.com

VUALTO'S LIVE AND VOD VIDEO EDITING AND PUBLISHING SOLUTION ALLOWS YOU TO PRODUCE MORE CONTENT, FASTER.

Powered by the VUALTO CONTROL HUB (VCH), CLIP2VU enables content owners to quickly and frame accurately clip highlights in real-time from live streams or VOD assets.

VIDEO EDITING OF LIVE AND VOD STREAMS

- Real-time, frame accurate live edge clipping.
- Thumbnail clipping makes it easy to identify and clip key moments right from the live edge of your stream.
- User friendly UI means any user can create broadcast quality edits; no editing expertise is required.

REMOTE PRODUCTION

- Effortless browser-based editing allows users to create high quality content from any location.
- Intuitive UI designed for the quickest possible user journey from editing to publication.
- Fast, collaborative editing.

MULTI-CLIP VIDEO AND HIGHLIGHT REELS

- Create a single asset from multiple clips to stitch highlight reels or insert sponsor content.
- Insert ads or slates.
- Mix content from live streams and your VOD library.

FRAME ACCURATE EDITING

- Multiple ways to quickly navigate to the exact start and end frames you want to clip. Zoom in/out of the thumbnail seek bar, use seek buttons in the UI, or use keyboard controls.
- Intuitive keyboard controls, in line with industry standards for professional editing software.

CUSTOMISED METADATA

- Define, manage and search custom metadata
- Use customised metadata workflows to target your publications: select languages, optimise bitrates for your chosen audience.
- Use pre-set profiles for different use cases: for compliance monitoring, social media syndication, brands, different types of content, specific channels, or for different distribution destinations.
- Search on keywords, tags, dates, event types.

GIF & JPEG CREATION

- Supports JPEG image capture and GIF creation.

SOCIAL MEDIA DISTRIBUTION

- Publish live streams and VOD clips to social media channels alongside traditional live and VOD distribution.
- Syndicate content to YouTube, Facebook and Twitter.

OPTIMISED FOR FAST CLIPPING

- Automated cloud-based workflows allow near-instant clipping and distribution of key moments.
- Supports large scale creation of short or long form content.

CUE-POINT CLIPPING

- Use cue point metadata for fast seeking to your clip in/out points.

LANGUAGE TRACK SELECTION

- Support for up to 32 languages.
- Select a single language for clipping, or include all available language tracks.

LIVE AND VOD STREAM INGEST

- Ingest content from various sources and formats.

PROTECT YOUR CONTENT WITH DRM

- Integrated with VUDRM multi-DRM.
